7 Conducting System:
Generate impulses & Give it to
heart muscles to contract.
Contraction of heart muscle should follow "all or, none" rule
All of none" - means that the 2 stria contract at the
same moment, relax at the same moment.
the same for ventricles.
this rule is achieved by Conducting System which
Consists of 8
(a) S. A. (sina atrial) node :) - poce moker
(a) S. A. (sina atrial) node :) ~ poce moker Creates the impulse
this impulse reaches the Atrioventricular (A. V.) node through (D.3 internodal system) posterior middle
through (b) 3 internodal system) posterior
middle
Lyonterior - From which
Bachmann's bundle comes out , enters
the left atrium, forms 3 intermed
System (similar) for impulse conducting
in left atrium
Contraction of the contraction o
(a) Atrioventricular node > From which Purkin Je system
DPINKETES elema consists as a DTI Rundle (Rulle a Ha)
